OFFICE OF THE DIRECTOR OF STATISTICS IN MYSORE,
Dated Bangalore, 13th September 1905.

EXPLANATORY MEMORANDUM.

The Tables issued as Supplement to the *Mysore Gazette* dated 3rd August 1905 furnish the figures for the seven years 1897-98 to 1903-04 Talukvar. The corresponding statistics for the year 1904-05 are printed in the following pages.

The Explanatory Memorandum printed with the previous Issue is applicable to the present issue also.

In the previous Issue, the proportion of the out-turn to the standard normal crop was given in terms of annas in the rupee only for the entire District for the several years of report. In the present Issue and for facility of comparison, the said proportion is given for each Taluk and the entire District for all the eight years for which the return has been made up.

T. ANANDA ROW,
Director of Statistics in Mysore.

SUMMARY OF SEASONS IN MYSORE DURING 1904.

The year's rainfall was on the whole deficient in all the Districts of the State except Shimoga where there was a slight excess over the average of past years. In the Taluks of Hoskote (Bangalore District), Malur (Kolar District), Krishnarajpete (Mysore District), Arsikere and Alur (Hassan District), Yedahalli (Kadur District), however, the fall was somewhat in excess of the average.

The pre-monsoon rains in April were more or less normal throughout the State. During subsequent months ending with September 1904, the rain-fall was more or less equally distributed and the agricultural prospects were generally hopeful. But a deficiency in the month of October and a total absence of rain in November and December set back cultivation and affected the standing crops to a great extent On account of this failure of the North-East monsoon, permission was granted by Government for the cultivation of tank beds with quick-growing crops. The year's rain-fall recorded 33·28 inches against 51·12 inches in 1903 and against 36·98 inches the average during 35 years preceding.

The following statement gives particulars of the rainfall during 1904 as compared with the average for 35 years.

District	Actual rain-fall during the year (Inches)	Average rain-fall for 35 years since 1870. (Inches)	Excess + or defect— (Inches)
Bangalore	26·16	30·52	—4·36
Kolar	22·73	28·24	—5·51
Tumkur	21·19	26·21	—5·02
Mysore	21·49	27·85	—6·36
Hassan	36·88	38·25	—1·37
Shimoga	69·31	66·83	+2·48
Kadur	70·31	74·00	—3·69
Chitaldrug	17·80	21·39	—3·59
Provincial average	33·28	6·98	—3·70

638

Proportionate yield for the eight years from 1897-98 to 1904-05.
